SUMMARY

I am a Frontend(ReactJs)/Full-Stack(MERN) web developer with 6 months of learning/working experience. I love to work with logic and build it by programming.

SKILLS

Front-end: ReactJs, Tailwind, React Bootstrap, HTML, CSS.
Back-end: NodeJs, ExpressJs, MongoDB, Django.
Others: Firebase, Problem-solving 100+.

PROJECTS

Greeho-Sheba   (20 Oct 2022) - Present

This is a complete website of Home Service.
Technologies: ReactJs, NodeJs, ExpressJs, MongoDB

- Customers can call for a service, and see all the order history.
- Service providers can accept orders related to their skills, and can see updates status, and Order History.
- Admin can see all the user's lists, can delete users, and add services also.

Live Site **|** GitHub_client_Side **|** GitHub_server_side

Get ride   (23 Nov 2022) - Present

Re-selling bicycles.
Technologies: ReactJs, NodeJs, ExpressJs, MongoDB

- Customers make a booking of a used cycle and see their booking summary on the dashboard. Also can report for a product.
- Saller can post for a used cycle, and get details of the customer who booked.
- Admin can see all users and delete them. Also can delete reported orders.
